

# CC Rolly

## The rolling half pallet

The CC Rolly is a rolling half pallet with the same internal dimensions as a half Euro Pallet, which enables simplified logistics planning. The CC Rolly is developed especially for transporting modular packaging. With everything moving on wheels, handling the CC Rolly is very easy. Your products can be rolled effortlessly from the store room to the shop floor by one person, with no need for lifting equipment.

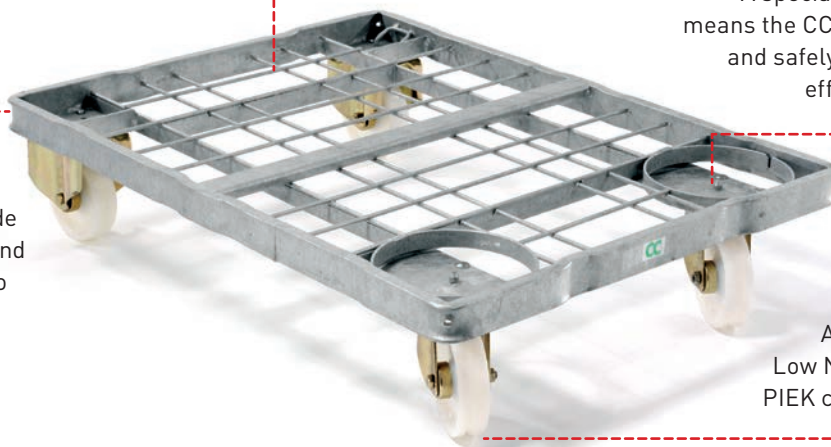

1/2 pallet 1/2 pallet

Can carry two stacks of 600 x 400 mm plastic crates, like CC Freshboxes, or other equivalent European modules.

A specially designed pocket means the CC Rolly stacks easily and safely, which ensures an efficient returns flow.

The smooth rounded corners provide safety in use and make it easy to position.

Also available as Low Noise Rolly, with PIEK certified wheels.

### Specifications

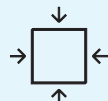

A = 811 mm      C = 182 mm      E = 40 mm  
 B = 142 mm      D = 605 mm

Average weight

400 kg UDL\*
