

CC Adapter Trays

The simple solution for storing rolling load carriers

The CC Adapter Trays have been developed for the transport and storage of dollies and rollies on which promotional displays are built. The dimensions of the adapter trays allow them to be placed safely on a (Euro)pallet without assembly. The fact that they are very light means they are easy and quick to process. The adapter trays allow the POS displays to be moved on automatic conveyor belts and stored in the warehouse racking.

Adapter tray 4ST

Holds 4 steel dollies.

The adapter tray offers cost-effective temporary storage for the rolling display. Suitable for internal use.

The tray can be tilted to a maximum of 7 degrees and can take a maximum load of 1000 kg with even distribution and the correct placement of the CC steel

Adapter tray 2EU

Holds 2 Euro Rollies.

Great stability due to notches.

The adapter tray is made out of robust and resistant plastic, which is completely recyclable. Extremely hard-wearing in everyday use.

Adapter tray 4EU

Holds 4 Euro Dollies.

1/1
pallet

The adapter trays are the size of a (Euro)pallet.

The CC Adapter Trays are only available as a sales item and not as a pool item. This concerns a one-off purchase for internal transport.

Type	Length (external)	Width (external)	Height (external)	Weight	Carrying capacity
4ST	1200 mm	800 mm	47 mm	2.3 kg	1,000 kg UDL
2EU	1220 mm	820 mm	36 mm	3.0 kg Euro Rolly	1,000 kg UDL
4EU	1206 mm	806 mm	50 mm	2.9 kg Euro Dolly	1,000 kg UDL

* UGL/UDL = Unter Gleichlast/Uniform Distributed Load
